## Related Commercial/Individual Exchange Policies

- [Breast Imaging for Screening and Diagnosing Cancer](#)
- [Preventive Care Services](#)

## Application

### UnitedHealthcare Commercial

This Medical Policy applies to UnitedHealthcare Commercial benefit plans, except UnitedHealthcare West benefit plans.

### UnitedHealthcare Individual Exchange

This Medical Policy applies to Individual Exchange benefit plans in all states, except for Illinois, Maryland, Massachusetts, Texas, and Wisconsin.

## Coverage Rationale

**A magnetic resonance imaging (MRI) or computed tomography (CT) imaging procedure in the hospital outpatient department is considered medically necessary for individuals who meet any of the following criteria:**

- Are participating in a clinical trial that requires a specific imaging protocol or equipment not available in a freestanding facility
- Are scheduled for the MRI/CT imaging procedure within 24 hours of a hospital specialist appointment at the same hospital-based facility where the procedure is requested
- Have a known allergy to a contrast agent used for the procedure
- Have a known chronic disease undergoing active treatment, when direct comparison to prior studies requires the same imaging protocol or equipment obtained at the same hospital-based facility where the procedure is requested
- Have a systemic cancer on active treatment, when restaging studies require the same imaging protocol or equipment used for prior studies obtained at the same hospital-based facility where the procedure is requested
- Preprocedure imaging, which is done within 24 hours of the interventional or surgical procedure and is an integral part of the planned procedure
- Require obstetrical observation
- Require perinatology services
- Under 18 years of age

**An MRI/CT imaging procedure in the hospital outpatient department is also considered medically necessary when there are no geographically accessible appropriate alternative sites for the individual to undergo the procedure, including but not limited to the following:**

- Moderate or deep sedation or general anesthesia is required for the procedure and a freestanding facility providing such sedation is not available; or

- The equipment for the size of the individual is not available; or
- Open MRI, which is not available in the freestanding facility, is required because the member has a documented diagnosis of claustrophobia and/or severe anxiety

**An MRI/CT imaging procedure in the hospital outpatient department is considered medically necessary when imaging in a physician's office or freestanding imaging center would reasonably be expected to delay care and adversely impact health outcome.**

**All other MRI/CT imaging procedures at a hospital-based imaging department or facility are considered not medically necessary.** This includes but is not limited to imaging for:

- Cancer screening
- Initial diagnosis and/or initial staging for suspected or known cancer
- Noncancerous musculoskeletal conditions
- Surveillance of cancer in remission, with no clinical suspicion for change in disease status

**Note:** Authorization is not required for procedures performed in an emergency department, observation unit, or urgent care center or during an inpatient stay.

## Medical Records Documentation Used for Reviews

Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. Medical records documentation may be required to assess whether the member meets the clinical criteria for coverage but does not guarantee coverage of the service requested; refer to the guidelines titled [Medical Records Documentation Used for Reviews](#).

## Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other policies and guidelines may apply.

| CPT Code                   | Description                                                                                                                                                            |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Computed Tomography</b> |                                                                                                                                                                        |
| 70450                      | Computed tomography, head or brain; without contrast material                                                                                                          |
| 70460                      | Computed tomography, head or brain; with contrast material(s)                                                                                                          |
| 70470                      | Computed tomography, head or brain; without contrast material, followed by contrast material(s) and further sections                                                   |
| 70471                      | Computed tomographic angiography (CTA), head and neck, with contrast material(s), including noncontrast images, when performed, and image postprocessing               |
| 70480                      | Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material                                                        |
| 70481                      | Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; with contrast material(s)                                                        |
| 70482                      | Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material, followed by contrast material(s) and further sections |
| 70486                      | Computed tomography, maxillofacial area; without contrast material                                                                                                     |
| 70487                      | Computed tomography, maxillofacial area; with contrast material(s)                                                                                                     |
| 70488                      | Computed tomography, maxillofacial area; without contrast material, followed by contrast material(s) and further sections                                              |
| 70490                      | Computed tomography, soft tissue neck; without contrast material                                                                                                       |
| 70491                      | Computed tomography, soft tissue neck; with contrast material(s)                                                                                                       |
| 70492                      | Computed tomography, soft tissue neck; without contrast material followed by contrast material(s) and further sections                                                 |

| CPT Code                   | Description                                                                                                                                            |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Computed Tomography</b> |                                                                                                                                                        |
| 70496                      | Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing                |
| 70498                      | Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing                |
| 71250                      | Computed tomography, thorax, diagnostic; without contrast material                                                                                     |
| 71260                      | Computed tomography, thorax, diagnostic; with contrast material(s)                                                                                     |
| 71270                      | Computed tomography, thorax, diagnostic; without contrast material, followed by contrast material(s) and further sections                              |
| 71271                      | Computed tomography, thorax, low dose for lung cancer screening, without contrast material(s)                                                          |
| 71275                      | Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing |
| 72125                      | Computed tomography, cervical spine; without contrast material                                                                                         |
| 72126                      | Computed tomography, cervical spine; with contrast material                                                                                            |
| 72127                      | Computed tomography, cervical spine; without contrast material, followed by contrast material(s) and further sections                                  |
| 72128                      | Computed tomography, thoracic spine; without contrast material                                                                                         |
| 72129                      | Computed tomography, thoracic spine; with contrast material                                                                                            |
| 72130                      | Computed tomography, thoracic spine; without contrast material, followed by contrast material(s) and further sections                                  |
| 72131                      | Computed tomography, lumbar spine; without contrast material                                                                                           |
| 72132                      | Computed tomography, lumbar spine; with contrast material                                                                                              |
| 72133                      | Computed tomography, lumbar spine; without contrast material, followed by contrast material(s) and further sections                                    |
| 72191                      | Computed tomographic angiography, pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing              |
| 72192                      | Computed tomography, pelvis; without contrast material                                                                                                 |
| 72193                      | Computed tomography, pelvis; with contrast material(s)                                                                                                 |
| 72194                      | Computed tomography, pelvis; without contrast material, followed by contrast material(s) and further sections                                          |
| 73200                      | Computed tomography, upper extremity; without contrast material                                                                                        |
| 73201                      | Computed tomography, upper extremity; with contrast material(s)                                                                                        |
| 73202                      | Computed tomography, upper extremity; without contrast material, followed by contrast material(s) and further sections                                 |
| 73206                      | Computed tomographic angiography, upper extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing     |
| 73700                      | Computed tomography, lower extremity; without contrast material                                                                                        |
| 73701                      | Computed tomography, lower extremity; with contrast material(s)                                                                                        |
| 73702                      | Computed tomography, lower extremity; without contrast material, followed by contrast material(s) and further sections                                 |
| 73706                      | Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing     |
| 74150                      | Computed tomography, abdomen; without contrast material                                                                                                |
| 74160                      | Computed tomography, abdomen; with contrast material(s)                                                                                                |
| 74170                      | Computed tomography, abdomen; without contrast material, followed by contrast material(s) and further sections                                         |
| 74174                      | Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing  |

| CPT Code                          | Description                                                                                                                                                                                                                                                                                                                                    |

## Clinical Evidence

### American College of Radiology (ACR)

The ACR provides guidance to support the safe and effective use of contrast media for patients undergoing contrast-enhanced imaging. Key general principles include:

- Confirm that contrast administration is clinically appropriate for the patient and the diagnostic indication
- Weigh the potential risk of an adverse event against the anticipated diagnostic benefit
- Support accurate, efficient diagnosis and treatment planning
- Maintain readiness to manage any reaction should one occur

In uncommon clinical situations, the urgency of performing a contrast-enhanced study may outweigh the advantages of prophylaxis, regardless of duration, necessitating that contrast medium be administered to a high-risk patient in the absence of premedication. This decision should be made collaboratively by the radiology team, the referring provider,

and, when feasible, the patient. When proceeding without prophylaxis, individuals skilled in resuscitation must be present during contrast administration to monitor for and appropriately address any reaction that may develop (ACR, 2025).

## American College of Obstetricians and Gynecologists (ACOG)

ACOG's committee on obstetric practice makes the following recommendations regarding diagnostic imaging procedures during pregnancy and lactation:

- Ultrasonography and magnetic resonance imaging (MRI) are not associated with risk and are the imaging techniques of choice for the pregnant patient, but they should be used prudently and only when use is expected to answer a relevant clinical question
- Radiation exposure through radiography, computed tomography scan, or nuclear medicine imaging techniques is at a dose much lower than the exposure associated with fetal harm
- The use of gadolinium contrast with MRI should be limited; it may be used as a contrast agent only if it significantly improves diagnostic performance and is expected to improve fetal or maternal outcome (ACOG, 2021)

## American Society of Anesthesiologists (ASA)

The 2015 ASA Practice Advisory on Anesthetic Care for Magnetic Resonance Imaging states that risks related to the patient may include age-related risks, health-related risks, and risks from foreign bodies located in or on the patient or implanted ferromagnetic items.

- Age-related risks apply to neonates or premature infants and older patients
- Health-related risks include but are not limited to:
  - Need for intensive or critical care
  - Impaired respiratory function (e.g., tonsillar hypertrophy, sleep apnea)
  - Changes in level of sedation, muscle relaxation, or ventilation
  - Hemodynamic instability and vasoactive infusion requirements
  - Comorbidities that may contribute to adverse MRI effects (e.g., burns or temperature increases in patients with obesity or peripheral vascular disease)
- Foreign bodies include non-medical ferromagnetic items imbedded in the patient (e.g., eyeliner tattoos) or attached to the patient (e.g., pierced jewelry; implanted ferromagnetic items may include items such as aneurysm clips, prosthetic heart valves, or coronary arterial stents)

## Instructions for Use

This Medical Policy provides assistance in interpreting UnitedHealthcare standard benefit plans. When deciding coverage, the member specific benefit plan document must be referenced as the terms of the member specific benefit plan may differ from the standard plan. In the event of a conflict, the member specific benefit plan document governs. Before using this policy, check the member specific benefit plan document and any applicable federal or state mandates. UnitedHealthcare reserves the right to modify its policies and guidelines as necessary. This Medical Policy is provided for informational purposes. It does not constitute medical advice.

This Medical Policy may also be applied to Medicare Advantage plans in certain instances. In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence ([Medicare IOM Pub. No. 100-16, Ch. 4, §90.5](#)).

UnitedHealthcare may also use tools developed by third parties, such as the InterQual® criteria, to assist us in administering health benefits. UnitedHealthcare Medical Policies are intended to be used in connection with the independent professional medical judgment of a qualified health care provider and do not constitute the practice of medicine or medical advice.
